**PALI**

#### **SYNERGY AS A DISTINCTIVE TRAIT**

Today, Tecnopali relies on the expertise  
of two highly qualified partners  
in the industrial sector:

San Polo Lamiere and Carpenter.

The integration of the production chain  
enhances the know-how consolidated by  
Tecnopali in the course of 40 years of business.

The goal is to ensure innovative solutions,  
becoming a benchmark company  
in the market of supports for lighting,  
communications and energy.

Tecnopali manages all phases of the production chain, from sheet metal coils to the implementation of infrastructures to provide lighting in large spaces. The lighting towers with fixed and mobile platform are high-tech products capable of meeting any need with regard to lighting and urban furnishing.

Tecnopali offers a range of products devoted to different areas in terms of telecommunications and safety in and out of town. By using the best materials and with its many years of experience in the design of infrastructure, Tecnopali can create products that adapt to customers' different needs.

The design and production skills of Tecnopali stand out the most when faced with great contemporary challenges. The advent of renewable energies leads to the need to create infrastructures for supporting wind and photovoltaic systems, as well as for the distribution of the electricity they produce. In addition to meeting specific technical requirements, the solutions designed by Tecnopali aim to reduce the environmental impact by adapting and integrating with the surrounding environment.

*"Tecnopali translates the elements as a sign of forefront  
such as street art, interpreting the space that opens itself  
to a contemporary sensory experience able to immerse  
men in surprising scenarios."*
